# CrashPlan™

CrashPlan for MSPs

Cyber-resilience, data recovery, and governance & compliance for your clients with unlimited storage and flexible, per device pricing.

CrashPlan is a proven solution:

- **>900k Users**
- **>1.4M Devices**
- **>100B Files Recovered Annually**
- **>90% Renewal Rate**
- **>7 year Average Customer Tenure**

Why Partner with CrashPlan:

As a CrashPlan MSP, you can rest easy knowing you're protecting your clients with the industry-leading endpoint backup and recovery solution to help them recover with:

- ✓ **Device Migration**
- ✓ **Remote Workforce Data Loss Management**
- ✓ **Ransomware and Disaster Recovery**
- ✓ **Version Control and Data Archives**

Plus, even though your customers come to you for support, we've got your back(up).

As a CrashPlan MSP, you will have all the training and support resources you need to help you sell and administer CrashPlan seamlessly. Our team of experts will partner with you through the sales and deployment process, and your technicians will receive full access to support from CrashPlan's highly-rated support and services team.

And, we built a solution specifically designed for you: CrashPlan for MSPs!

CrashPlan for MSPs has integrated with the ConnectWise RMM and is now available through the **Connectwise Marketplace** as an **ASIO Certified** integration. Scan to learn more!

Customer Testimonials

"The utility that CrashPlan has represented is incredible, especially when it comes to protecting all of our clients' business data. Clients constantly rely on our IT services, and protecting each of their information is paramount: that is where CrashPlan's role comes into play, protecting each of the client's files and important information with encryption keys… The usability of CrashPlan has favored our MSP company."

– TAMIKA M., CEO, QORE8

"Being a company that offers MSP services, we must protect our clients' data and the database that we use for each of the IT services we offer them at all costs, which is why the use of CrashPlan has proven to be so important, due to the magnificent security and file recovery it has, making automated copies of databases in the cloud, recovering past versions of files, recovering files lost during the administration of cloud services, and much more. The protection of cloud services is impressive and allows us to offer security against data loss for all of our clients who access our services."

– ANDREA M., CEO, ELEINFOTY

Unlock your growth potential and greater value with CrashPlan for MSPs

We built CrashPlan for MSPs to provide unparalleled data resiliency for your customers with the visibility, billing flexibility, and administrative functionality that you need to drive sustainable profitability. Built on the industry-defining endpoint backup and recovery solution CrashPlan for MSPs gives you the tools to never have to worry about a customer losing data again.
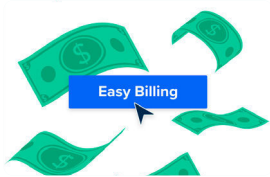

Broad Protection
Support the breadth of your customers' install base with complete protection for macOS, Windows, and Linux and a platform that can scale from as little as 1 to greater than 100,000 users.

Rapid Deployment
With zero hardware to deploy plus integrations with industry standard deployment and identity management solutions, measure deployment in hours rather than months.
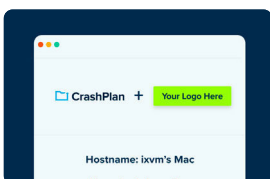

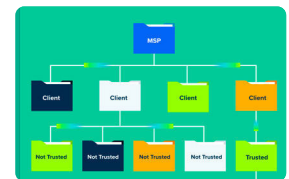

Easy Billing
Completely cut guesswork out of the cost-structure with no license cap or prepayment and unlimited storage. Rapidly perform chargebacks and get back to focusing on your client's satisfaction.

Delegated Administration
Allow your administrators to serve as high-level oversight or hands-on support for your customers with robust role-based access controls and organization-specific settings.

Co-Branding
Provide the personal touch with templated co-branding functionality. Serve your (or your customer's) logo directly alongside ours in the endpoint agent and web-administration interfaces.

Build Value and Grow Revenue Now!
